
Website Audit Report

Neurological Society of Pune (NSP)

Prepared by: Claude Code – Automated Audit
Date: April 01, 2026
Scope: Full-stack audit of 6 HTML pages, CSS, and JavaScript
Branch: claude/audit-website-Y06Q1
Status: Fixes Applied & Pushed

1. Executive Summary

A comprehensive audit was conducted on the Neurological Society of Pune (NSP) website, a static HTML site built on the Staffx template using Bootstrap 5, jQuery 3.7.1, and various jQuery plugins. The audit covered **6 HTML pages**, **1 main JavaScript file**, **CSS stylesheets**, and **asset references**.

The audit uncovered **16 distinct issues** across 3 severity levels. Of these, **11 have been fixed** in this commit, with 5 remaining items requiring manual content updates or decisions from the site owner.

Severity	Found	Fixed	Remaining
Critical	5	5	0
High	5	4	1
Medium	6	2	4
Total	16	11	5

2. Technology Stack

- **Framework:** Static HTML5 (Staffx template by Vikiglab)
- **CSS:** Bootstrap 5, custom SCSS (23 source files), Font Awesome 6
- **JavaScript:** jQuery 3.7.1, Slick Slider, AOS, Magnific Popup, Nice Select, Waypoints
- **Pages:** index.html, about.html, activities.html, committe.html, contact.html, invited_faculties.html

- **Assets:** 60+ images, 1 video (hero-section.mp4), SVG faculty profiles
- **Build tools:** None (manual SCSS compilation via VSCode)

3. Critical Issues (Fixed)

C-01: JavaScript Crash: progressPath is null

File: assets/js/main.js : Lines 57-58

Description: document.querySelector('.progress-wrap path') returns null on pages without a .progress-wrap element. Calling getTotalLength() on null causes a TypeError that halts ALL JavaScript execution on every page, breaking the sticky header, mobile menu, sliders, and all interactive features.

Fix Applied: Wrapped progressPath block in a null guard: if (progressPath) { ... }

C-02: Font Awesome CDN Returns 404

File: All 6 HTML pages (line ~24)

Description: All pages referenced font-awesome/7.0.1/css/all.min.css via CDN. Font Awesome v7.0.1 does not exist on cdnjs — the latest major version is 6.x. This CDN link returned a 404 error, meaning all FA icons loaded via CDN would not display.

Fix Applied: Changed to font-awesome/6.5.1/css/all.min.css with correct SRI integrity hash.

C-03: Template Placeholder Data Visible to Users

File: index.html : Lines 291-293 (mobile menu)

Description: The mobile menu displayed the original template's dummy contact data: phone '+57 9954 6476', email 'hello@exdos.com', and location 'Bhemeara, Kushtia'. Additionally, the phone and envelope icons were swapped (envelope icon showed phone number, phone icon showed email).

Fix Applied: Replaced with real NSP data: +91 76859 00400, ajit@ascenthospitality.in, Kothrud Pune; fixed icon order.

C-04: Footer Shows 'Contact details to be updated'

File: All 6 HTML pages (footer email row)

Description: The email row in the footer's Contact NSP column displayed visible placeholder text 'Contact details to be updated' instead of actual contact information.

Fix Applied: Replaced placeholder with the real email: ajit@ascenthospitality.in.

C-05: Wrong Page Title on Activities Page

File: activities.html : Line 7

Description: The <title> tag read 'About Us - Neurological Society of Pune' instead of 'Activities'. This affects browser tabs, bookmarks, SEO, and screen readers.

Fix Applied: Changed to 'Activities - Neurological Society of Pune'.

4. High Priority Issues

H-01: Broken Internal Links (3 non-existent pages)

File: index.html

Description: team.html referenced 6 times (team member names), projects-single.html referenced 4 times (Key Milestones), and blog-single.html referenced 5 times (blog cards). None of these pages exist.

Fix Applied: team.html → invited_faculties.html; projects-single.html and blog-single.html → activities.html.

H-02: AOS Animations Not Working on 2 Pages

File: committe.html, invited_faculties.html

Description: Both pages included the AOS library but never called AOS.init(), so data-aos scroll animations would never trigger. Elements would remain invisible or unstyled.

Fix Applied: Added AOS.init({ once: true }) script block to both pages.

H-03: Inconsistent Mobile Menu Logos

File: committe.html, invited_faculties.html

Description: These two pages used logo1.png for the mobile menu while all other pages used '21 Logo.png', causing inconsistent branding in the mobile navigation.

Fix Applied: Standardized to '21 Logo.png' across both pages.

H-04: Swapped Prev/Next Slider Arrows in main.js

File: assets/js/main.js : Multiple lines

Description: Five Slick slider configurations had prevArrow and nextArrow selectors swapped: prevArrow pointed to '.next-arrow' and vice versa. This caused prev buttons to go forward and next buttons to go backward.

Fix Applied: Corrected all 5 swapped arrow configurations.

H-05: Committee Page Shows Faculty Data (Not Committee Members)

File: committe.html

Description: The committee page displays the exact same faculty profiles as invited_faculties.html. It does not contain actual committee member information (President, Secretary, Treasurer, etc.).

Status: Requires real committee member data from site owner.

5. Medium Priority Issues

M-01: Contact Form Accessibility Gaps

File: contact.html : Lines 519-541

Description: Form inputs had no <label> elements, no id/name attributes, and no aria-required. Screen readers could not identify form fields.

Fix Applied: Added visually-hidden labels, id, name, and aria-required attributes.

M-02: Footer Bootstrap Grid Issue

File: All 6 pages (footer copyright row)

Description: The col-lg-12 copyright div was placed directly inside .container, outside the .row wrapper. Bootstrap grid columns must be inside a .row for correct rendering.

Fix Applied: Wrapped col-lg-12 inside a new row div; also fixed © symbol.

M-03: All Social Media Links Are Placeholder href='#'

File: All 6 pages (header, footer, mobile menu)

Description: Facebook, LinkedIn, Instagram, YouTube links in the footer and mobile menu all point to '#'. These need to be updated with actual NSP social media URLs.

Remaining: Requires actual social media URLs from site owner.

M-04: Missing Alt Text on All Images

File: All 6 pages

Description: Nearly all tags have empty alt="" attributes. Preloader, logo, team member photos, blog images, gallery images, and footer logos all lack descriptive alt text. This significantly impacts accessibility and SEO.

Remaining: Requires descriptive alt text for each image.

M-05: Filename Typo: committe.html

File: committe.html + all nav links

Description: The file is named 'committe.html' (missing 'e'). Should be 'committee.html'. Renaming requires updating nav links across all 6 pages and could break existing bookmarks.

Remaining: Deferred — renaming needs coordinated update and redirect strategy.

M-06: Missing Font Awesome TTF Fallbacks

File: assets/css/plugins/fontawesome.css

Description: FontAwesome CSS references .ttf fallback files and Pro font families (duotone, light, thin) that don't exist on disk. Modern browsers use .woff2 (which exists), but older browsers may fail.

Remaining: Low priority — .woff2 covers 97%+ of modern browsers.

6. JavaScript Audit Details

The main application script (`assets/js/main.js`, 477 lines) was audited for runtime errors, logic bugs, and code quality issues.

Location	Severity	Issue	Status
Line 57-58	CRITICAL	progressPath null crash — halts all JS	FIXED
Line 106	BUG	AOS.init; (no-op, missing parentheses)	FIXED
Lines 130-131	BUG	Swapped prev/next arrow (.case-slider)	FIXED
Lines 170-171	BUG	Swapped prev/next arrow (.testimonial)	FIXED
Lines 189-190	BUG	Swapped prev/next arrow (.hero-slider)	FIXED
Lines 283-284	BUG	Swapped prev/next arrow (.cas3-widget)	FIXED
Lines 390-391	BUG	Swapped prev/next arrow (.service-widget)	FIXED
Lines 126, 166+	INFO	loop: true is not a valid Slick option (ignored)	N/A
Lines 475-478	INFO	Counter code outside IIFE wrapper	N/A

7. Files Modified in This Fix

File	Changes
index.html	Fixed CDN, template placeholders, broken links (team/projects/blog), footer grid
about.html	Fixed CDN, footer placeholder, footer grid
activities.html	Fixed CDN, wrong title tag, footer placeholder, footer grid
committe.html	Fixed CDN, AOS.init, mobile logo, footer placeholder, footer grid
contact.html	Fixed CDN, form accessibility (labels/ids/aria), footer placeholder, footer grid
invited_faculties.html	Fixed CDN, AOS.init, mobile logo, footer placeholder, footer grid
assets/js/main.js	Fixed null crash, AOS.init no-op, 5 swapped slider arrows

8. Recommendations for Site Owner

- **1. Add real social media URLs** — Replace all `href='#'` social links with actual NSP Facebook, LinkedIn, Instagram, and YouTube pages.

- **2. Add descriptive alt text to images** — Every image should have meaningful alt text for accessibility and SEO.
- **3. Update committee page content** — Replace duplicated faculty data with actual committee member information (President, Secretary, Treasurer, etc.).
- **4. Rename committe.html to committee.html** — Fix the filename typo and update all navigation links across the site. Set up a redirect from the old URL.
- **5. Set up a contact form backend** — The form currently submits to '#'. Integrate with a service like Formspree, Netlify Forms, or a custom backend.
- **6. Add privacy policy and terms pages** — The footer links to Privacy Policy and Terms of Condition point to '#'.
- **7. Consider a build pipeline** — Add a package.json with SCSS compilation, CSS/JS minification, and image optimization for production.
